

ACID CONDENSATE NEUTRALIZER

NEUTRAL PRO

Acid condensate neutralizer for boilers

Designed for boilers up to 35Kw

Transparent body for a easy check

Air drain in conformity to UNI 7129-05

Quick and easy refill

Prevent pipes from corrosion

Compact and easy to install

Wall fixing kit included

Two set of calcium carbonate refill included

Item N	Size	L	H	H1
H152N.35	3/4" x 20	180	163	135

INSTALLATION

The NEUTRAL PRO neutralizer is the ideal and easy-to-install solution to allow the acid condensate produced by condensing boilers to drain without damaging pipes, sinks and gutters.

Thanks to the 20mm adjustable hose connectors, it can be easily installed directly under the boiler or in any other position that allows correct operation, keeping the inlet connection upwards and the outlet downwards; the wall fixing kit is supplied with the product.

For correct operation, the NEUTRAL PRO Neutralizer must always be mounted in a vertical position:

HO TO REFILL

The chemical neutralization is guaranteed by the calcium carbonate (CaCO_3); two refill kits are included in the package.

Thanks to the transparent body, it is easy and intuitive to verify the need to insert a new set of neutralizing substance; the neutralizing substance must still be replaced at least once a year even if not completely exhausted.

Rubinetteria Malgorani Pietro SRL reserves the right to make improvements and changes to the products described and the related technical data at any time and without notice: always refer to the instructions attached to the supplied components, this sheet is an aid if they are too schematic.
